

## QuickBooks Online Edition

PMSolutions and QuickBooks® Financial Software work together to simplify your business management. QuickBooks Online Edition offers business planning tools, tailored to your business type, to make it simple to monitor business performance and payables, receivables and payroll.

Using QuickBooks Online Edition means there's no need to purchase upgrades, back up data, or network computers for multiple users/accountants to be able to access your books simultaneously.

PMSolutions uses QuickBooks Online Edition as its back-end accounting system. The two programs are seamlessly integrated, thereby eliminating the need for double entries. If you are already using another accounting system, QuickBooks can be used as a city ledger, or you can use it to run your entire business " from payroll to billing.
