

## Easy to Use

PMSolutions is fun and easy to use. We put a lot of information at your fingertips, but we also give you the power and flexibility to organize your data in a way that is intuitive for you. For example:

Available units can be organized according to three different criteria (ie view, location, building, hottub, shared bath...what ever makes sense for your operation) of your own choosing.

Third-party billing can be set up in ways that are unique to each party: ie sundry items and taxes can be billed to the guest, or billed to the third party.

Actual rooms can be assigned during the reservation process, or you can reserve a type of room (ie Queen bed, water view) first and assign an actual room number upon check in.

PMSolutions exists to make your life easier. If there is a feature that you would like us to add to our software, please contact us. Many of the interesting features that set us apart from other pms systems were ideas that came from our client base.
